

Propane is Energy for all

Propane is a Canadian energy source, produced in Canada, for Canadians, from coast to coast

from heating homes, drying crops, powering forklifts to transporting children to school.

Propane is affordable

Saving you money – **up** to **45%** cost savings

Efficient, with furnaces running as much as 98% efficiency compared to oil furnaces at 60%

Zero risk of contamination, **lowering** insurance bills

Propane is accessible

Highly portable and versatile

Unmatched in distribution infrastructure across Canada

Perfect for rural and remote locations, delivered and stored in a tank without deterioration

Ideal for critical infrastructure like hospitals.

It continues to work, even when the electric grid fails

Propane is clean

Recognized by governments globally as a low-carbon energy that improves indoor and outdoor air quality and reduces GHG emissions.

A lower emission energy source than heating oil, diesel, and gasoline, and in some regions, **propane is even cleaner than the electrical grid.**

Renewable – propane made from 100% renewable materials is already being produced in Canada, the U.S. and Europe.

Regional Statistics

Quebec

Annual economic value created by the industry

\$225M GDP in 2018

Number of households using propane as a main energy source

4,445

Annual taxes and royalties paid by the propane industry \$101M

Number of jobs that rely on the propane industry

1,936

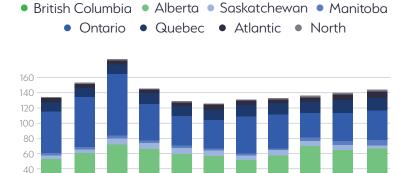

Number of propane fuelling stations

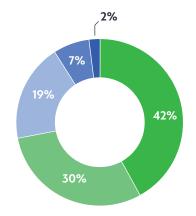

176

Propane production by region

(thousands of barrels per day [kb/d])

Propane demand by sector in 2020

- Non-energy use & producers' consumption
- Manufacturing & construction
- Commercial / Institutional
- Residential
- Mining & oil and gas
- Transportation
- Agriculture
