

Propane is *Energy for all*

Propane is a Canadian energy source, produced in Canada, for Canadians, from coast to coast

Used daily by 100,000's of Canadians

from heating homes, drying crops, powering forklifts to transporting children to school.

Propane is affordable

Saving you money – up to **45% cost savings**

Efficient, with furnaces running as much as **98% efficiency** compared to oil furnaces at 60%

Zero risk of contamination, lowering **insurance bills**

Propane is accessible

Highly **portable** and **versatile**

Unmatched in distribution infrastructure across Canada

Perfect for rural and remote locations, delivered and stored in a tank without deterioration

Ideal for critical infrastructure like hospitals. **It continues to work, even when the electric grid fails**

Propane is clean

Recognized by governments globally as a low-carbon energy that improves indoor and outdoor air quality and reduces GHG emissions.

A lower emission energy source than heating oil, diesel, and gasoline, and in some regions, **propane is even cleaner than the electrical grid.**

Renewable – propane made from 100% renewable materials is already being produced in Canada, the U.S. and Europe.

Regional Statistics

The North

Annual economic value created by the industry

\$4M GDP in 2018

Number of households using propane as a main energy source

4,433

Annual taxes and royalties paid by the propane industry

\$2M

Number of jobs that rely on the propane industry

26

Number of propane fuelling stations

4

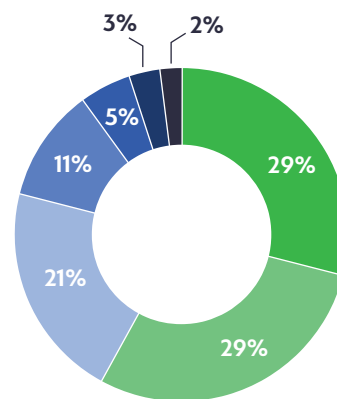

Estimated government revenues generated by type

(\$ millions)

- **\$1** Indirect taxes
- **\$0** Carbon taxes
- **\$0** Personal income taxes
- **\$0** Corporate income taxes
- **\$0** Other taxes
- **\$0** Royalties

Propane demand by sector in 2020

- Non-energy use & producers' consumption
- Mining & oil and gas
- Commercial / Institutional
- Agriculture
- Residential
- Transportation
- Manufacturing & construction

Did you know?

Propane is *Energy for All* – including Canada's northernmost communities. They experience 'polar day' (also known as the "midnight sun") during summer and 'polar night' during winter when the sun doesn't shine at all. By supplying solar power projects with backup energy, propane reduces GHG emissions and saves communities millions in diesel cleanups. Unlike diesel, propane does not harm air, land or water.
