

Propane is *Energy for all*

Propane is a Canadian energy source, produced in Canada, for Canadians, from coast to coast

Used daily by 100,000's of Canadians

from heating homes, drying crops, powering forklifts to transporting children to school.

Propane is affordable

Saving you money – up to **45% cost savings**

Efficient, with furnaces running as much as **98% efficiency** compared to oil furnaces at 60%

Zero risk of contamination, lowering **insurance bills**

Propane is accessible

Highly **portable** and **versatile**

Unmatched in distribution infrastructure across Canada

Perfect for rural and remote locations, delivered and stored in a tank without deterioration

Ideal for critical infrastructure like hospitals. **It continues to work, even when the electric grid fails**

Propane is clean

Recognized by governments globally as a low-carbon energy that improves indoor and outdoor air quality and reduces GHG emissions.

A lower emission energy source than heating oil, diesel, and gasoline, and in some regions, **propane is even cleaner than the electrical grid.**

Renewable – propane made from 100% renewable materials is already being produced in Canada, the U.S. and Europe.

Regional Statistics

British Columbia

Annual economic value created by the industry

\$658M GDP in 2018

Number of households using propane as a main energy source

31,090

Annual taxes and royalties paid by the propane industry

\$261M

Number of jobs that rely on the propane industry

3,161

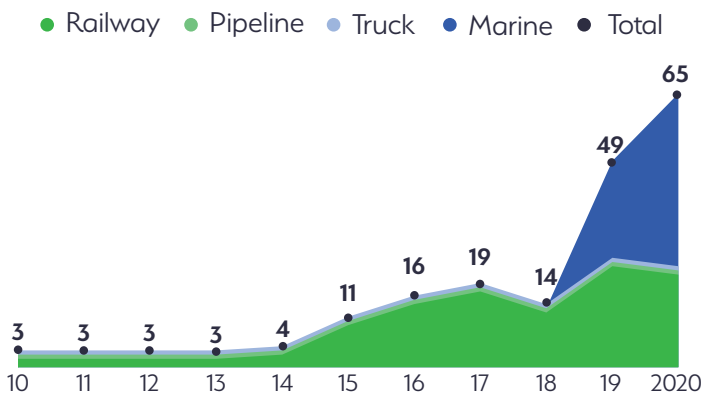

Number of propane fuelling stations

147

Propane exports by transport mode

(thousands of barrels per day [kb/d])

Propane demand by sector in 2020

Did you know?

Canada's first propane export facility is located near Prince Rupert. Altagas' Ridley Island Propane Export Terminal offers Canada's natural gas producers direct access to international markets and a 15-day shipping advantage vs. the U.S. Gulf Coast. The terminal currently offloads about 50 to 60 rail cars of liquid propane from B.C. and Alberta each day.
